

Fact Sheet

Our Services

Summary

Dendory Capital is a Cloud & DevOps consulting services company. We're based in Montreal, Canada, and have been in operation since early 2019. Started by Patrick Lambert, someone with 15 years of experience in IT, we quickly grew a team of experts in various fields as we worked for clients including entrepreneurs, startups and small to medium sized businesses.

This document describes some of the services we offer. We have fixed-cost packages along with custom hourly services, offering projects ranging from a single consulting call to many months of work. We try to meet the business needs of our clients and can adjust our offerings as needed.

The Startup Pack

The Startup Pack

A Wordpress or Shopify website
with your own custom domain

A professional email address
yourname@yourcompany.com

A professional tech expert with
you over email or phone to help

Now starting at \$149

contact@dendory.ca

The Startup Pack was crafted to meet the needs of individual entrepreneurs or small startups for one small price. We can provide you with a professional email address with your name and your business name, a web site and tech support to guide you along the path, starting at \$149. Then, we can offer managed hosting with various additional options. Find out more at <https://dendory.ca/the-startup-pack>

The VOIP Pack

THE VOIP PACK

A toll-free number for your business with lots of options!

A PROFESSIONAL TOLL-FREE NUMBER

- A professional looking number for clients to use, like (855) 410-2420.
- No need to give out your personal phone number anymore.
- Can be forwarded to any phone, even if you change number.

MANY ADDITIONAL OPTIONS

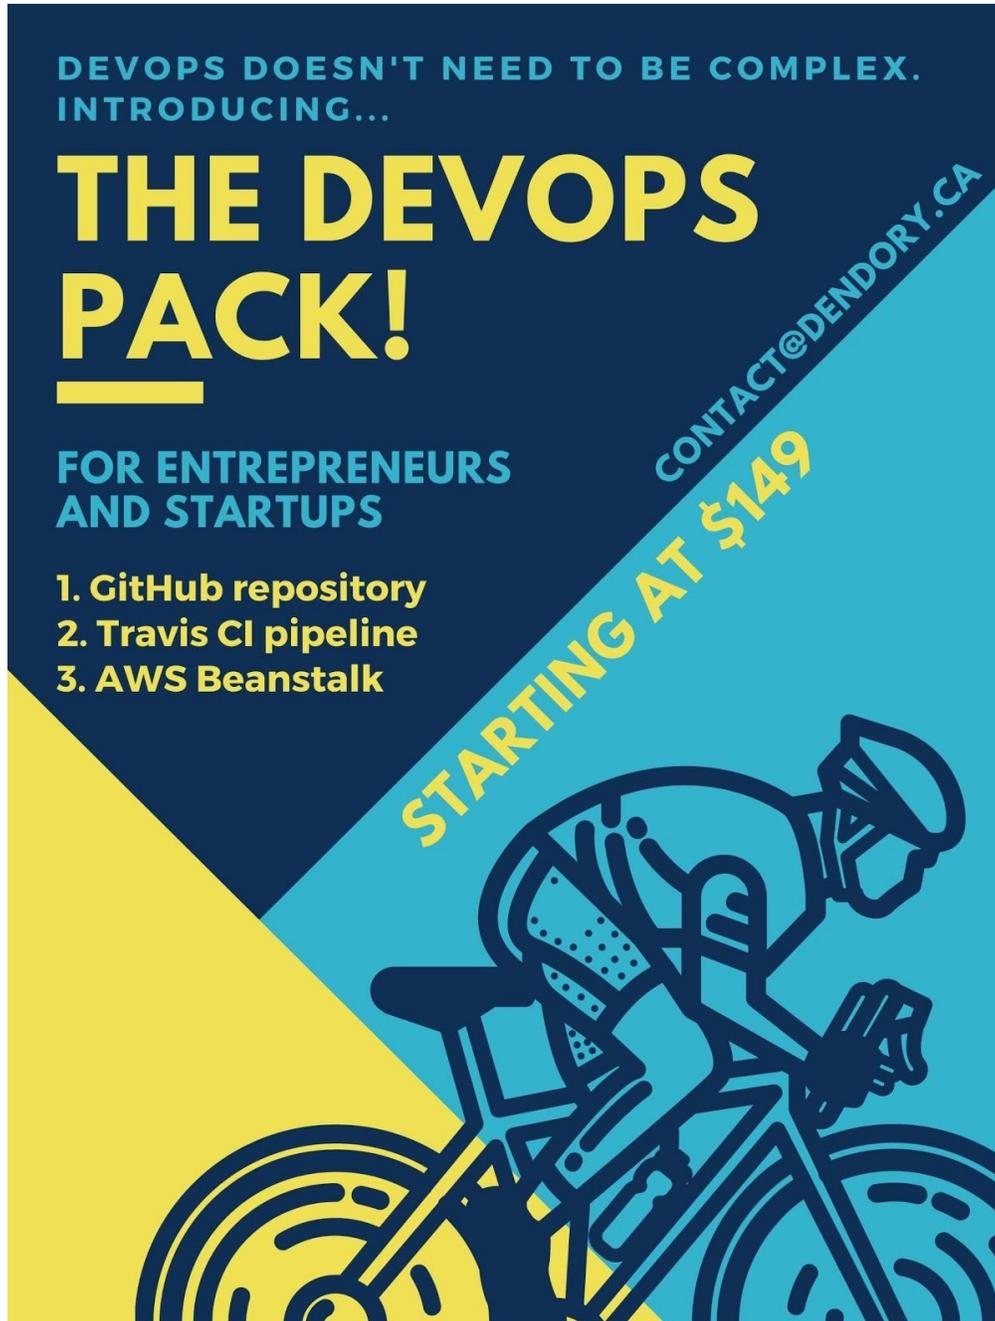

- Custom greetings and prompts.
- Set office hours, so that you don't get calls in the middle of the night.
- Tech support to make sure you never have an issue with your number.
- Managed hosting for a low monthly cost.

Starting at \$95.

DENDORY.CA

If you interact with clients by phone, why should they get your personal phone number? A toll-free number makes you look more professional, and gives you a lot more options, such as custom greetings and the ability to set office hours so your phone doesn't ring at 3am. You don't have to be a large business to afford these. Since this is a fully VOIP solution, we can route the call over to any network and any phone, including multiple recipients if needed, at no additional cost. Find out more at <https://dendory.ca/the-voip-pack>

The DevOps Pack

DEVOPS DOESN'T NEED TO BE COMPLEX.
INTRODUCING...

THE DEVOPS PACK!

CONTACT@DENDORY.CA

FOR ENTREPRENEURS
AND STARTUPS

1. **GitHub repository**
2. **Travis CI pipeline**
3. **AWS Beanstalk**

STARTING AT \$149

The DevOps pack provides a CI/CD pipeline based on popular open source tools for developers, so your app or web site can be deployed from GitHub to the cloud automatically, allowing you to push updates whenever you need. Find out more at <https://dendory.ca/the-devops-pack>

The Cloud Audit Pack

WHEN WAS
YOUR LAST
COMPREHENSIVE
CLOUD AUDIT?

Introducing...

**The Cloud
Audit Pack**

A one week audit of your cloud environments covering over 100 points, including:

- Making sure your instances, buckets and resources are locked down properly.
- Saving costs by using reserved instances.
- Following industry best practices.
- And much more...

STARTING AT \$495

DENDORY.CA

A comprehensive audit of your cloud environments, covering both AWS and Azure, going over 100 points and ending with an actionable report that you can use to save money and ensure that your resources are safe and secure. Find out more at <https://dendory.ca/the-cloud-audit-pack>

The Data Pack

The graphic features a light blue background with a grid of dots in the upper right. On the right side, the text 'DENDORY.CA' is written vertically. The main title 'The Data Pack' is in a large, bold, blue font, with the subtitle 'Managed Big Data in the cloud' below it. A list of three services is on the left: '1. Data lake in Amazon S3', '2. Data warehouse in AWS Redshift', and '3. Data analytics using Amazon QuickSight'. At the bottom left, it says 'Starting at \$295'. On the right, an illustration shows three people (a woman in a blue skirt and yellow top, and two men in yellow jackets) gathered around a blue presentation board displaying a line graph. The board is on a stand with decorative plants at its base.

The Data Pack
Managed **Big Data** in the cloud

1. Data lake in Amazon S3
2. Data warehouse in AWS Redshift
3. Data analytics using Amazon QuickSight

Starting at \$295

DENDORY.CA

Big Data is how insurance companies know what a good driver you are, and how much they can charge for your policy. It's how web sites know which ad campaigns work and which don't. It's how large amounts of data get stored, parsed and analyzed. And now, Big Data is available as a managed service. Starting at \$295, we can create an entire data lake, data warehouse and setup dashboards and reports for you. Find out more at <https://dendory.ca/the-data-pack>

Custom services

Most engagements are done on a contract basis, paid hourly. Our base rate for professional services is \$75/h + taxes, while managed services differ based on the individual needs. The following services are offered:

Web hosting

We can host web sites or web apps in the AWS or Azure cloud, either for small sites on shared infrastructure or large web apps requiring global presence. This can be custom designed content,

on Wordpress, Shopify and more. We can also host custom apps requiring Docker, CDNs, media streaming and more.

Cloud deployments

We can deploy content to the AWS and Azure clouds, either for a brand new environment or migrations of existing environments, including hybrid clouds. This is always done using infrastructure-as-code, and we can either manage the environment or deliver the deployed environment as is.

DevOps

From deploying CI/CD pipelines, infrastructure as code, and containers using Jenkins, Amazon CodePipeline or Azure DevOps, we can make sure your developers will deploy code quicker and easier than ever before.

Security and Auditing

Whether you have to meet a specific government norm, or you just want to make sure your resources are following best practices, we can offer custom audits adapted to your needs.

Consulting

Sometimes you just need someone to talk with your people by email, phone or team meetings, to provide education or assistance for yourself or your own in-house people.

Working with experts

Dendory Capital is an AWS and Microsoft partner, and we have trained experts to work on your projects, so you can be sure that we provide the best service you can expect. Also, because we automate everything and work with infrastructure-as-code, it means things get done faster, at a lower cost for you.

Our entire infrastructure is state of the art, using best practices with multiple backups being done daily, all sensitive data kept on encrypted disks with two-factor authentication access, logs and we have liability insurance to cover all the work we do.

We're always available over email or phone to help with any technical issue you encounter while the project is underway, and we provide transparent billing so you know exactly what you pay for.

Get started now

You can visit our website at <https://dendory.ca> to find out more. Also make sure you visit our pages on LinkedIn, Twitter and Facebook, and subscribe to our blog.

Contact us at contact@dendory.ca or by phone at (877) 769-5507 to discuss your needs and we'll be happy to answer any question you may have.
